

BlackBox Component Builder - Bug #200

network file delete under Win10 sometimes fails

06/30/2019 09:11 AM - J. Templ

Description			
<p>Under Windows 10 it has been observed that deleting a file on a network share sometimes does not work. This is possibly related to using a virus scanner. However, repeating the delete attempt does work and this leads to the proposed change appended below.</p> <p>Reported by Rainer Neubauer, 2019-06-03</p>

History

#1 - 06/30/2019 09:15 AM - J. Templ

In HostFiles.Delete change the following line

```
UNTIL (res # fileExistsErr) & (res # alreadyExistsErr) & (res # paramErr) & (res # sharingErr) OR (n = 0);
```

to

```
UNTIL (res # fileExistsErr) & (res # alreadyExistsErr) & (res # paramErr) & (res # sharingErr) & (res # accessDeniedErr) OR (n = 0);
```
