<b>Target version:</b>	1.7		
<b>Forum topic:</b>			
<b>Description</b>			
<p>In BB1.6 it is not possible to underline spaces and tabs as it is usual in text processors such as Microsoft Word or Open Office. In order to be able to use BB based applications in an office environment for producing professional style text documents it is required to have underlined white spaces. The same applies to strikethrough.</p> <p>A proposal by J. Templ for adding this feature exists in CPC 1.7 rc5.</p> <p>Refers to CPC 1.7 rc5 change list number 33, 34, and 66.</p>			

### Associated revisions

#### Revision b711b077 - 06/10/2015 10:42 AM - J. Templ

underlining white space added. Refs: #60.

As proposed by Josef Templ and Helmut Zinn in CPC 1.7 rc5

but without a flag for switching it on and off.

The special treatment of printer frames has been commented because it was not possible to produce a test case where it shows a difference.
